

Talk together.

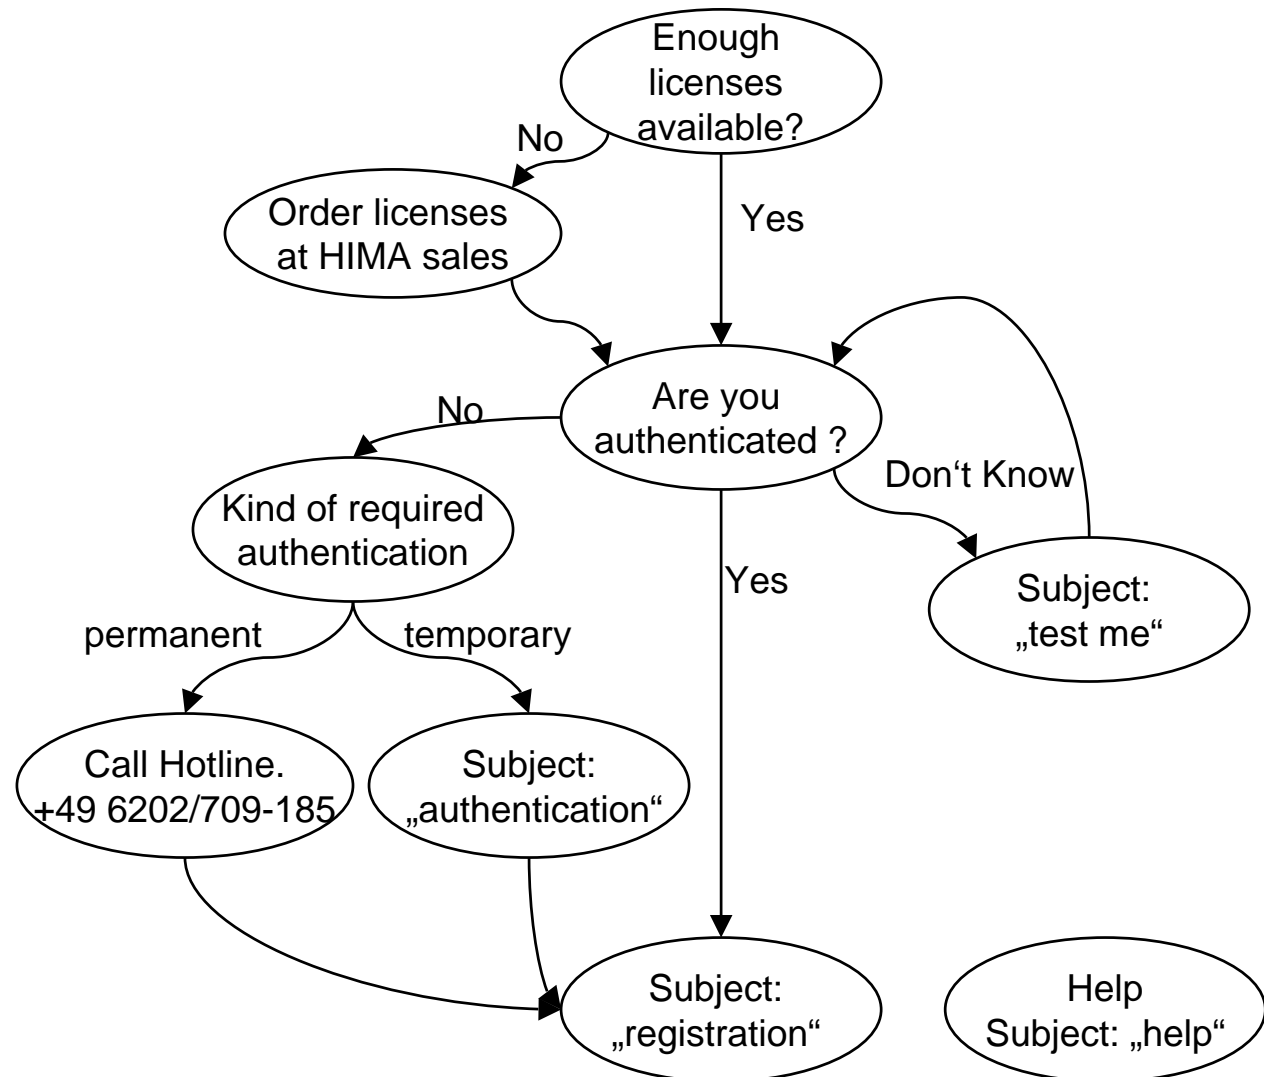

Mail service for activation code generation.

- ➔ As usual the activation codes can be generated in <http://himatrix.hima.de>
<http://himatrix.hima.com>
- ➔ An additional new e-mail service is available:
- ➔ Send an e-mail to license@hima.com and get an e-mail with the activation codes.
- ➔ The tasks are specified by the subject in the e-mail.
- ➔ *License number* is the number you find on your delivery note (6 numeric characters).
Activation code is the >20 character string you have to enter in ELOP II Factory.

How to use mail registration.

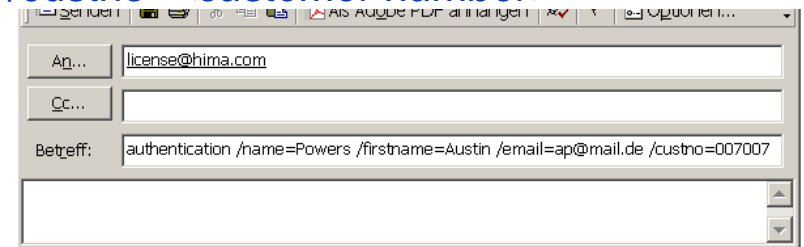

Talk together.

Authentication (temporary).

- ➔ Send an e-mail with the subject:
“authentication /name=<name> /firstname=<firstname>
/email=<email-address> /custno=<customer number>”

to receive an answer
confirming that you
can receive activation
codes within the next
7 days for max. 24h
to your e-mail account.

The screenshot shows an email composition window. The 'To' field contains 'license@hima.com'. The 'Cc' field is empty. The 'Subject' field contains 'authentication /name=Powers /firstname=Austin /email=ap@mail.de /custno=007007'. The email client's interface includes standard buttons like 'An...', 'Cc...', and 'Betreff:'.

- ➔ <name> is your name
<firstname> is your firstname
<email-address> is the email address from that you send the
request and to where you'll get the answer
<customer number> is your customer number that you find
on the delivery note. (6 numeric characters)

Talk together.

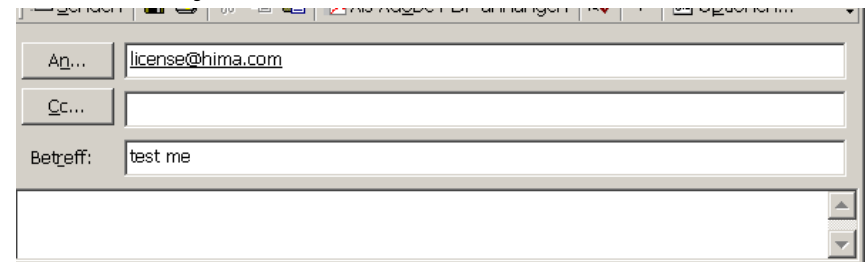

test me.

➔ Send an e-mail with the subject:

“test me”

to receive an
answer whether
you are a
able to receive

activation codes from the e-mail account you are using.

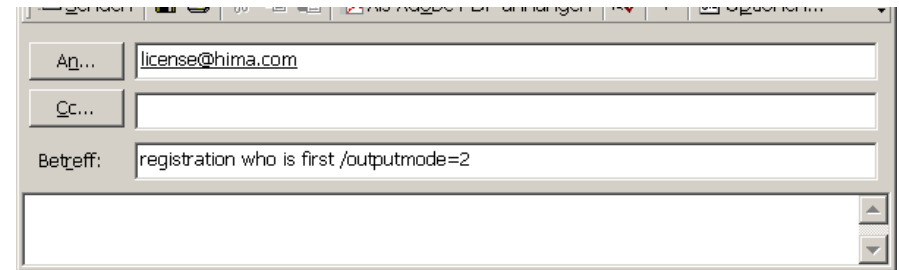

A screenshot of an email client window. The 'To:' field contains 'license@hima.com'. The 'Cc:' field is empty. The 'Betreff:' (Subject) field contains 'test me'. The body of the email is empty.

Talk together.

Registration (1/3).

- ➔ Send an e-mail with the subject:
“registration [text] /outputmode=<x>”
to receive an
answer including
the activation
codes.

The screenshot shows an email composition window. The 'To:' field is filled with 'license@hima.com'. The 'Cc:' field is empty. The 'Subject:' field is filled with 'registration who is first /outputmode=2'. There is a large empty text area below the subject field.

- ➔ Where
[text] will be returned in the subject of the reply mail.
<x>=1 codes in the mail
<x>=2 codes in the attached text file (default)
- ➔ Attach a text file (see next page)

Talk together.

Registration (3/3).

- ➔ It is possible to upgrade an activation code. (downgrade is impossible)
- ➔ Enter your existing activation code in the column "f.code".
- ➔ The IP and SRS have to be entered and will be checked whether they are the same as in the existing code.
- ➔ Enter the license number(s) for the type of option(s) you want to add. It is the users responsibility not to use an option twice in the same code.

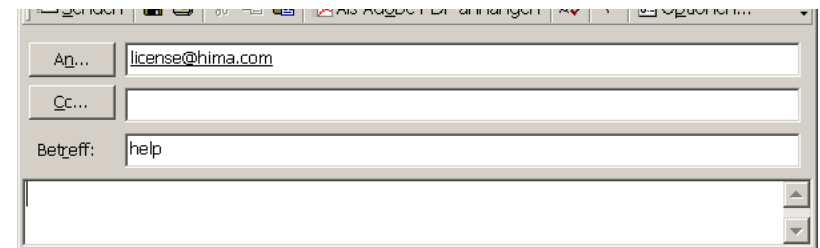

Talk together.

Help.

➔ Send an e-mail with the subject:

“help”

to get a brief
description of
the functionalities
of the mail access.

The screenshot shows a classic email client interface. The 'To' field is populated with 'license@hima.com'. The 'Subject' field is populated with 'help'. The 'Cc' field is empty. The email body is also empty. The window title bar indicates it's an email client.
