

TÜV FUNCTIONAL SAFETY TRAINING PROGRAM

Safety instrumented Systems

(within the TÜV functional safety program)

Dear Professional,

Would you like to learn and evaluate your knowledge concerning the different phases to implement a Safety Instrumented System (SIS)? Then this proposal requires your attention and become recognized by the international professional safety community.

HIMA Functional Safety Consultant Services (FSCS) within the TÜV Rheinland Functional Safety Program presents this Functional Safety Engineer (FS Eng) review course to help you to meet the IEC 61508 and IEC 61511 standards requirements for being competent in the various life-cycle stages of a Safety Instrumented System. Your competency can be acknowledged after a 3.5 day review course & successful exam with a personal TÜV Functional Safety certificate.

This training has become the HIMA FSCS flagship for advocating the Functional Safety know-how world wide and has been followed by over 2000+ participants in the last 7 years. Comments received from participants up to now have been unanimous approval.

Trainer

Eugen Kull

TÜV FS Expert Trainer

HIMA Paul Hildebrandt Gmb

Location: Port Harcourt, Nigeria

Date: 20th June – 23rd June 2017

Duration: 3 ½ Days

Price: USD 3000.00
